

HEAVY DUTY MOIST HAND WIPES

Designed to remove oil, grease, grime and ground-in dirt, inks, paints and tar without the need for towel and water.

Convenient, heavy duty cleansing wipes for removing stubborn industrial contamination.

Grimex are absorbent fabric wipes impregnated with a blend of surfactants, solvents and moisturising agents to help remove even the most stubborn grease and grime and still leave the skin feeling supple and soft.

Blended surfactants emulsify oily deposits making their removal easy. Moisturising agents prevent excessive defatting of the skin. The blend also gives Grimex its non-perfumed and non-tainting properties.

Grimex wipes are ideal for use in remote situations where the use of conventional washing facilities is impractical or impossible...and

they're also extremely effective in removing a variety of industrial contaminants from hard surfaces.

Dirty hands can lead to skin sensitisation and dermatitis.

Being unperfumed Grimex is used extensively by the Metropolitan Police and by Scene of Crime officers across the country.

So, whether you're repairing telecommunication links in the middle of a field or fine tuning an engine in the pits at Silverstone, with Grimex, there's no excuse for dirty hands!

Hazard Identification...	No hazardous materials.
Fire Fighting Measures...	Non-combustible.
Handling Storage...	Stored in a frost free environment out of direct sunlight, Grimex has a shelf life of 2 years.
Biodegradability...	Fluid is biodegradable, fabric degrades over length of time.
Disposal...	Never flush to sewer or water courses. Grimex is non-hazardous waste but when contaminated with oil or other harmful substances it should be treated accordingly.
