

# Convenient, alcohol free cleansing wipes for removing contamination while sanitising hard surfaces.

Protex wipes are moistened with a proprietary blend of biocides and water to offer excellent cleaning and decontaminating properties for long lasting sanitisation.

Suitable for use in the food industry where hygiene is a priority, Protex is safe to use on most hard surfaces including metal, plastic, vinyl, wooden furniture and painted surfaces.

Protex has been specially developed to meet NHS requirements for the cleansing and decontamination of equipment and hard surfaces in line with the code of practice set out in the infection control manual.

Protex is recommended for use wherever surfaces need sanitising and an alcohol containing wipe is deemed inappropriate, either because of the odour or the searching nature of alcohol itself.

Hazard Identification...	No hazardous materials.
Fire Fighting Measures...	Non-combustible.
Handling Storage...	Stored in a frost free environment out of direct sunlight, Protex has a shelf life of 2 years.
Biodegradability...	Fluid is biodegradable, fabric degrades over length of time.
Disposal...	Never flush to sewer or water courses. Protex is non-hazardous waste but when contaminated with other harmful substances it should be treated accordingly.

## HARD SURFACE BACTERICIDAL CLEANING WIPES

Protex solvent free moist wipes are the strong and effective way to clean and disinfect hard surfaces.
